

Wayfair Boosting Brief – October 2026

This brief aligns Boosting Partnership creators with what our **paid social** teams are actively selecting for **Meta** and **TikTok**. We boost native creator video (vertical, 15–45 seconds) that could run as a paid ad. Seasonal *mood* is welcome; **promo-heavy** creative (codes, limited-time offers, sale graphics) is not our main boost pool.

What we’re boosting on Meta

When	Priority	What to film
Early October	Fall & Halloween	Cozy layers, fall decor, entryway/porch, dining setup, livable Halloween styling (product visible early)
Mid–late October	Holiday preview	Trees & trim, entertaining prep, guest-ready spaces, giftable furniture/decor shown in room
All month	Evergreen	Any strong in-room, in-use Wayfair story (office, bedroom, outdoor, storage, rugs, seating)

What we’re boosting on TikTok

Theme	What to film
Pet	Pet-friendly furniture, pet beds, washable rugs, storage; pet and product clearly in frame
Sideboards	Styled dining, entry, or living; sideboard/console in use (not unbox-only)
Halloween	Styled at-home Halloween; hook and product in the first few seconds
Wayfair Verified	Feature Verified products when you can; show the badge on applicable items

Across both platforms: Hook in 1–3 seconds. Show the Wayfair product early, in a real styled space, with you on camera, hands-on, or POV. Add captions — many viewers watch with sound off.

Boost-friendly creative

Element	Guideline
Length	15–45 seconds
Format	Vertical video (Reels / TikTok). Carousels are not used for paid boost.
Product	Clear Wayfair item, shown in use in a lived-in space (not unboxing only)
Creator	Face-to-camera, hands-on, or POV
Pacing	Brisk and easy to follow; hold shots long enough to see detail
Text	Simple, readable captions; on-screen text on long enough to read

Great fits vs. usually skipped

Great fits

- Product in a styled space **and** in use
- Clear story: problem → product → benefit
- Bright, informal, native creator tone
- One clear Wayfair product and use case

Examples: [Reel 1](#), [Reel 2](#)

Usually skipped

- Unboxing only, no lifestyle or use case
- Hard-to-read or off-brand text overlays
- AI-looking footage or website screen recordings
- Unclear which Wayfair product is featured; dark or confusing openings

Eligibility hashtags

#WayfairCreator • **#wayfairelevate**

Include both tags in your caption (case-insensitive). Use your normal paid partnership disclosure when required (for example **#ad**); eligibility for boosting follows the two program hashtags above.

How selection works

We receive more eligible posts than we can boost each month. October selections follow the **Meta** and **TikTok** priorities on page 1, plus creative fit and a mix of rooms, styles, and price points.

Posting eligible content does **not** guarantee boost, but it matches what Paid teams are actively pulling right now. Some posts are selected but not every selection runs as a live boost (testing and performance can affect what goes live).

Frequently asked questions

Do Meta and TikTok want the same videos?

Same creative standards, different monthly themes. Use the Meta table for fall, Halloween, holiday preview, and evergreen; use the TikTok table for pet, sideboards, Halloween, and Wayfair Verified.

Can I post sale or Way Day promo content?

You can post sales content for your audience, but paid boost mainly pulls evergreen storytelling — product in room, in use — not codes or limited-time offer graphics.

What if my Reels product tags don't work?

Use your creator link in caption or bio and mention it on video. We know tagging is frustrating; linking still matters for your commission.

Why wasn't my video boosted?

Selection depends on monthly priorities, creative fit, and volume. This brief is the shared criteria Paid and WCP align on each month — we cannot review every post individually.

You asked, we're listening

In the September 2026 boosting survey, creators asked for clearer guidance on what gets selected. **12 of 17** said more direction from Wayfair would help them post more consistently. This monthly brief is that direction.

Your October checklist

- Ship 1–2 **fall / Halloween** reels with product in the first 3 seconds (Meta).
- Ship TikTok-aligned content: **pet, sideboards, Halloween, or Wayfair Verified** where it fits your home.
- Mid–late month: 1–2 **holiday preview** pieces (evergreen tone, no promo codes).
- Anytime: **evergreen** in-use room content.
- **15–45 sec**, vertical, captioned, you on camera or hands-on.
- Caption: **#WayfairCreator + #wayfairelevate** + required disclosure.

Tips to get boost-ready

- Film product in use in a styled space — not just unboxed on the floor.
- Lead with the hook; don't delay the product reveal.
- Invest in pieces you're proud to leave up if not selected (especially when using #ad).
